

Luca D. Mendoza

Web Developer

Crafting dynamic scalable web solutions with a passion for technology.

Hello, I'm passionate about technology. I'm a web developer, where I'm developing myself and learning new things about this great profession.

About

I started programming in 2019 by taking online courses. I was captivated by the idea of building applications to make others' daily work easier, so I enrolled at the Faculty of Exact Sciences at Unicen to study Systems Engineering and University Technology in IT Application Development, with a focus on web application development.

In 2022, I began working at "Siete Ideas" on frontend development with Angular.

In my free time, I usually enjoy hiking in the Tandil.

Skills

JavaScript

Experience

2023 – Present | Part-Time

Frontend Engineer · Event Loop Club

I'm a founding member of this personal project developed with a group of developers. I serve as a Developer Frontend Engineer, contributing to the design and development of modern and efficient web applications. My focus includes building reusable components, integrating RESTful services, and performing unit and integration testing to ensure product quality. Additionally, I collaborate on the planning and execution of technical strategies to drive the project's growth.

2022 – Present | Full-Time

Frontend Developer · Siete Ideas

Develop and maintain web applications using Angular. Implement responsive and attractive user interfaces, create reusable components, and integrate RESTful services. Conduct unit and integration testing, maintain the application, and manage production deployments.

EDUCATION

March, 2024 | Nest + GraphQL: Evolucioná tus APIs | Fernando Herrera
