

Luca D. Mendoza

Full-Stack Engineer

Angular architecture, scalable backend systems, and product-driven engineering.

About Me

Full-Stack Engineer with 5+ years of experience building production web applications and digital products. Track record in the end-to-end development of digital wallets, payment systems, B2B platforms, e-commerce, and logistics solutions.

My scope spans from architecting reactive, modular frontend interfaces in Angular to building backend services and REST/WebSocket APIs with NestJS and Go, along with relational database modeling.

Professional Experience

Co-founder & Full-Stack Developer · [Eventloop.ar](#)

Dec 2023 - Present | Professional Independent

Web platform development from initial stages, leading Angular UI construction and backend engineering.

- Frontend Core: Built and maintained the Angular codebase, delivering modular components, Tailwind CSS, Angular Material layouts, and REST API integrations.
- State Management: Implemented NgRx and RxJS for state management and data flow optimization.
- Backend Contributions (Go): Maintained Go API endpoints and WebSockets for real-time notifications.

Lead Full-Stack Engineer · XTECHARG

Oct 2024 - Mar 2026 | Professional Independent

End-to-end technical leadership and software development for a B2B SaaS platform from scratch. Designed software architecture across frontend (Angular 19 Standalone, NgRx, SSR) and backend (NestJS, PostgreSQL, TypeORM), managed infrastructure, security, OAuth2/JWT authentication, and integrated payment gateways (Mercado Pago, CoinPayments) alongside OpenAI conversational assistants.

Frontend Developer · [Siete Ideas](#)

Feb 2022 - Mar 2026 | Full-Time

Engineered large-scale web applications using Angular. Executed framework modernizations and migrations (Angular 9 -> 11 -> 18 Standalone). Developed responsive interfaces, reusable component libraries, RESTful API integrations, unit/integration tests, and handled production deployments.

Skills

- Frontend: Angular (Signals, Standalone Components, SSR), TypeScript, RxJS, NgRx, Tailwind CSS, Angular Material
- Backend & APIs: NestJS, Go, Node.js, Express.js, TypeORM, PostgreSQL, REST, WebSockets, GraphQL, OAuth2, JWT
- AI-Assisted Dev: Cursor, OpenAI API, GitHub Copilot, Codex, Prompt Engineering
- DevOps & Tools: Git, Docker, Dokploy, CI/CD (GitHub Actions), DBeaver, Postman
- Testing & Workflow: Jasmine, Karma, Jest, Figma, ClickUp, Mercado Pago, Stripe, Google APIs

Education

Faculty of Exact Sciences, Unicen

2020 - 2023

Bachelor's Degree in Systems Engineering · Associate Degree in Information Technology Application Development

Certifications

- **2026 — NestJs + Reportes: Genera PDFs desde Node · Udemey**

certificate: <https://www.udemy.com/certificate/UC-f8066510-989d-4e09-ae42-c2e217721892/>

- **2026 — OpenAI: Ejercicios y asistentes con Angular + NestJS · Udemey**

certificate: <https://www.udemy.com/certificate/UC-bcbf2846-ce9b-4c06-9764-568fea9b6e99/>
